

The SB-7 Currency Discrimination Counter

- **Minimizes** cash handling by counting up to 1,500 bills per minute
- **Counts and sorts** paper and polymer bills for multiple currencies
- **Enhances** detection of counterfeit and suspect bills
- **Reduces** errors and mistakes by processing and verifying bills automatically

Fast and Efficient

The SB-7 is a highly reliable and accurate desktop currency discriminator. As the world's smallest desktop currency discriminator, the SB-7 provides dollar value and unit counts for all denominations in a single pass. In addition, the machine can then sort the bills by denomination.

Commercial Grade Currency Discrimination Counter

The SB-7 is best suited for organizations that are looking for accuracy, efficiency and a more robust currency counting product. Call today for a product demonstration

The SB-7 Currency Discrimination Counter

Impressive Standard Features

The SB-7 provides fast and accurate counting of Canadian and U.S. currencies. Other currencies are available. The SB-7 provides several modes of operation including "mixed" mode, giving the ability to count mixed bills in a single pass and provide the total dollar value as well as the individual value for each denomination counted. Select "Issue" mode and sort paper from polymer bills saving countless hours.

Improve Accuracy; Ensure Savings!

The SB-7 will save you hours of time counting and processing bills, and will provide superior performance compared to old style currency counting technology. Accurate and reliable performance every time will ensure that you're not wasting valuable time reprocessing bills. SB7 utilizes the most reliable image processing technology combined with superior mechanical reliability to deliver fast accurate results every time you use it.

Reliable and Fast

The SB7 is a commercial quality currency processing device, designed to meet the day-to-day challenges of processing and counting in banking, foreign exchange, retail, and gaming environments. With its unrivaled accuracy, versatility and speed, the SB7 will simply outperform many of its competitors. Variable count speeds up to 1500 bills per minute, selectable pre-set batch settings or user selectable batch settings can all be accessed using the 10 digit keypad.

Big Savings in a Small Package

With a modern design, full graphic 2.8" LCD display, and a user-friendly interface, the SB-7 provides the user with a simple, efficient device to improve productivity and count accuracy. This compact desktop counter (H 28.0 cm x W 26.9 cm x D 26.1 cm) provides more functions than a standard currency counter. Functions such as rejecting "suspect" bills into the reject pocket without stopping the count, network connectivity, accurate counterfeit detection and rejection are just a few.

Polymer Ready

Designed to count both polymer and paper bills for multiple currencies. SB-7 has the ability to separate paper from polymer bank notes into separate pockets with ease. Being able to count and process up to 1,500 bills per minute, SB-7 is 50 percent faster than other standard currency counters in the market today.

Specifications

Weight:	8 KG (17.6 lbs)
Countable Note Size:	5cm x 10 cm to 10 cm x 18.5 cm
Counting Speed:	1000-1500 notes per minute
Hopper Capacity:	500 notes (approx.)
Stacker Capacity:	200 notes (approx.)
Reject Capacity:	30 notes (approx.)
Batching:	Five pre-set batches (10, 20, 25, 50, 100) and variable 1 to 999 via numeric keypad
Power Supply:	100-240 VAC, 50/60 Hz
Dimensions:	H 28.0 cm x W 26.9 cm x D 26.1 cm
Features:	Compact Size 2.8" Graphic LCD Display Multi-Currencies Capability (US/ Canada) Selectable Modes – Single, mixed, Count, Issue Enhanced Counterfeit Detectors (UV / MR / IR) Dual-User System Easy Upgrade Easy Jam Removal
